Cumulative Contents

	PAGE
Editorial. *I. G. C. Dryden*	1
Pyrolysis of New Zealand sub-bituminous coals. *J. O. Elphick*	5
High-field proton magnetic resonance of coal-carbonization products. *K. D. Bartle and D. W. Jones*	21
A further electron spin resonance study of solvent action on coal. Solvent action at higher temperatures. *C. Yokokawa*	29
Zinc-dust distillation of soil humic compounds. *E. H. Hansen and M. Schnitzer*	41
Fuels for fuel cells. *F. Jones*	47
Semiconduction of iodine complexes of asphaltenes. *G. A. Sill and Teh Fu Yen*	61
Use of carbonic acid to concentrate kerogen in oil shale. *Rex D. Thomas*	75
nternal surface burning in anthracite P. F. Particles. *A. C. N. Tucker*	105
A microscopic investigation into the formation of fly-ash during the combustion of a pulverized bituminous coal. *A. R. Ramsden*	121
The combustion of single captive particles of Silkstone coal. *F. R. Brookes*	139
On the chemistry of the coal-ammonia-oxygen reaction. *S. K. Chakrabartty and N. Berkowitz*	151
Evolution of gases from sub-bituminous coal. *P. S. Groom*	161
Measurements of the viscosity of super cooled slags at 750° to 1100°C. *J. Boow*	171
Composition of pyridine extracts from reduced and untreated coals as determined by high-resolution mass spectrometry. *T. Kessler, R. Raymond and A. G. Sharkey Jr.*	179
ESR studies of virgin coals. *Hideo Ohuchi, Masaru Shiotani and Junkichi Sohma*	187
Association of vanadium chelates in petroleum asphaltenes as studied by ESR. *Edmund C. Tynan and Teh Fu Yen*	191
Kinetics of chloroform extraction of coal and its chars. *Tsuneo Yoshii and Futoru Yoshimura*	229
The effect of regeneration temperature and pressure on the adsorptive capacity of silica gel in a hydrocarbon environment. *A. K. Kotb and J. M. Campbell*	237
Properties of the coal macerals. Infra-red spectra of alginites. *R. Millais and D. G. Murchison*	247
The rapid carbonization of high organic sulphur New Zealand coals: Part I. *N. J. Peet, S. R. Siemon and J. B. Stott*	259
Reflectance of ball coals. *D. Chandra, K. K. Chatterjee and M. L. Gupta*	271
Some aspects of the low temperature pyrolysis behaviour of coal. *S. K. Mookherjea and B. K. Mazumdar*	277
Combustion of coal in thin sections. *M. Shibaoka*	285
Coal pyrolysis using laser irradiation. *F. S. Karn, R. A. Friedel and A. G. Sharkey, Jr*	297

Combustion behaviour of thermoplastic polymer spheres burning in quiescent atmospheres of air. *R. H. Essenhigh and W. L. Dreier* 330

Further investigations of structural changes occurring in pulverized coal particles during rapid heating. *P. J. Street, R. P. Weight and P. Lightman* 343

Fusion of silicate particles in coal flames. *E. Raask* 366

The reactions of discharge-generated hydrogen species with coals and carbons: Part I Primary reaction products and kinetics. *N. Berkowitz and Yuzo Sanada* 375

Recent Developments and Notes. *D. G. Edwards* 81, 209, 304, 389

Announcements 94

Overseas Correspondents' Notes 91, 309, 395

Publications 314, 396

Erratum 316

Pittsburgh Award 1968 215

Letters to the Editor: Laser irradiation of oxidized coals. *A. G. Sharkey Jr., A. F. Logar and F. S. Karn* 95

The use of arsenazo (III) in the determination of total sulphur in coal by the oxygen-flask method. *S. M. Ahmed and B. J. P. Whalley* 217

Electrokinetic measurements on coal and a criterion for its hydrophobicity. *R. R. Jessop and J. L. Stretton* 317

The acid equivalents of some humic acids derived from fossil fuels. *G. J. Lawson and C. V. Phillips* 398

Abstracts—French 97, 220, 321, 401

Abstracts—German 101, 225, 325, 404

Indexes 407

Classified Contents

Abstracts—French, 97, 220, 321, 401
Abstracts—German, 101, 225, 325, 404
Alginites, I R spectra of, 247
Asphaltenes, petroleum, association of vanadium chelates in, 191
— semi-conducting properties of iodine complexes of, 61

Coals, ball, reflectance of, 271
— chloroform extraction, kinetics of, 229
— combustion, of single captive particles of, 139
— — in thin sections, 285
— electrokinetic measurements on, and hydrophobicity, 317
— ESR studies of solvent action on, 29
— ESR studies of virgin coals, 187
— fly ash formation during combustion of, 121
— internal burning in pulverized particles of anthracite, 105
— mass spectrometric determinations on pyridine extracts from, 179
— oxidised, gases produced on laser irradiation of, 95
— pyrolysis, composition and rates of release of gas products, 161
— — effect of moisture on yield of fixed carbon, 5
— — at low temperatures, 277
— — using laser irradiation, 297
— reaction with ammonia-oxygen mixtures, 151
— reactions with discharge-generated hydrogen species, 375
— structural changes during rapid heating of pulverized particles of, 343
— sulphur, total, determination of, 217
Combustion, of oxidised coals, gases produced on laser irradiation, 95
— of pulverized coal, microscopic investigation of fly ash formation, 121
— of single captive particles of coal, 139
— of thermoplastic polymer spheres, 330
— of thin sections of coal, 285
Editorial, 1
Electrokinetic measurements on coal, 317
Erratum, 316
ESR, of association of vanadium chelates in petroleum asphaltenes, 191
— of solvent action on coal, 29
— of virgin coals, 187

Flotation of coals, electrokinetic measurements, 317
Fly ash, microscopic investigation of formation of during combustion of pulverized coal, 121
Fuel cells, review of fuels for, 47

Humic acids, acid equivalents of, 398
Humic compounds, structure elucidation by zinc dust distillation, 41
Hydrocarbons, absorption of, with silica gel, 237
Hydrophobicity, of coal, 317

Internal surface burning in pulverized particles of anthracite, 105

Laser irradiation of coals, 297
— of oxidised coals, study of gases produced, 95

Mass spectrometric determination of pyridine extracts from coals, 179

Oil shale, use of carbonic acid to concentrate organic material from, 75
Overseas correspondents notes, 91, 309

Pittsburgh award (1968), 215
Polymer spheres, thermoplastic, combustion of, 329
Proton magnetic resonance of coal carbonization products, 21
Publications, 314, 396
Pyrolysis of coals, containing high organic sulphur, 259
— effect of moisture on yield of fixed carbon, 5
— at low temperatures, 277
— sub-bituminous, composition and rates of release of gas products from, 161
— using laser irradiation, 297

Recent developments and notes, 81, 209, 304, 389
Reflectance of ball coals, 271

Silica gel, effect of regeneration temperature and pressure on the hydrocarbon absorptive capacity, 237
Silica Particles, fusion of in coal flame, 366
Slags supercooled, viscosity of, 171
Soil, humic acids, acid equivalents of, 398
— humic compounds, structure elucidation of, 41
Sulphur, high organic, rapid carbonization of coals containing, 259
— in coal, detn of, by the oxygen-flask method using arsenazo (III), 217

Vanadium chelates, association of, in petroleum asphaltenes–as studied by ESR, 191
Viscosity of supercooled slags 171
